

Django_Project

The screenshot shows the Visual Studio Code editor with the Django project structure on the left and the content of `about.html` in the main editor. The project structure includes a `blog` app with `static` and `Templates` subdirectories. The `Templates` directory contains `about.html`, `base.html`, `home.html`, `post_confirm_delete.html`, `post_detail.html`, `post_form.html`, and `user_posts.html`. The `about.html` file is currently selected and its content is displayed in the main editor.

```
1 {% extends "blog/base.html" %}
2 {% block content %}
3     <h1>About Page</h1>
4 {% endblock content %}
```

The screenshot shows the Visual Studio Code editor with the Django project structure on the left and the content of `base.html` in the main editor. The project structure is the same as in the previous screenshot. The `base.html` file is currently selected and its content is displayed in the main editor.

```
